One Woman Owner

One Woman Owner is a unique car marketplace designed specifically for women, providing a safe and reliable car-buying platform. Our client approached us to design and develop a modern, user-friendly website that reflects their values and attracts female buyers.

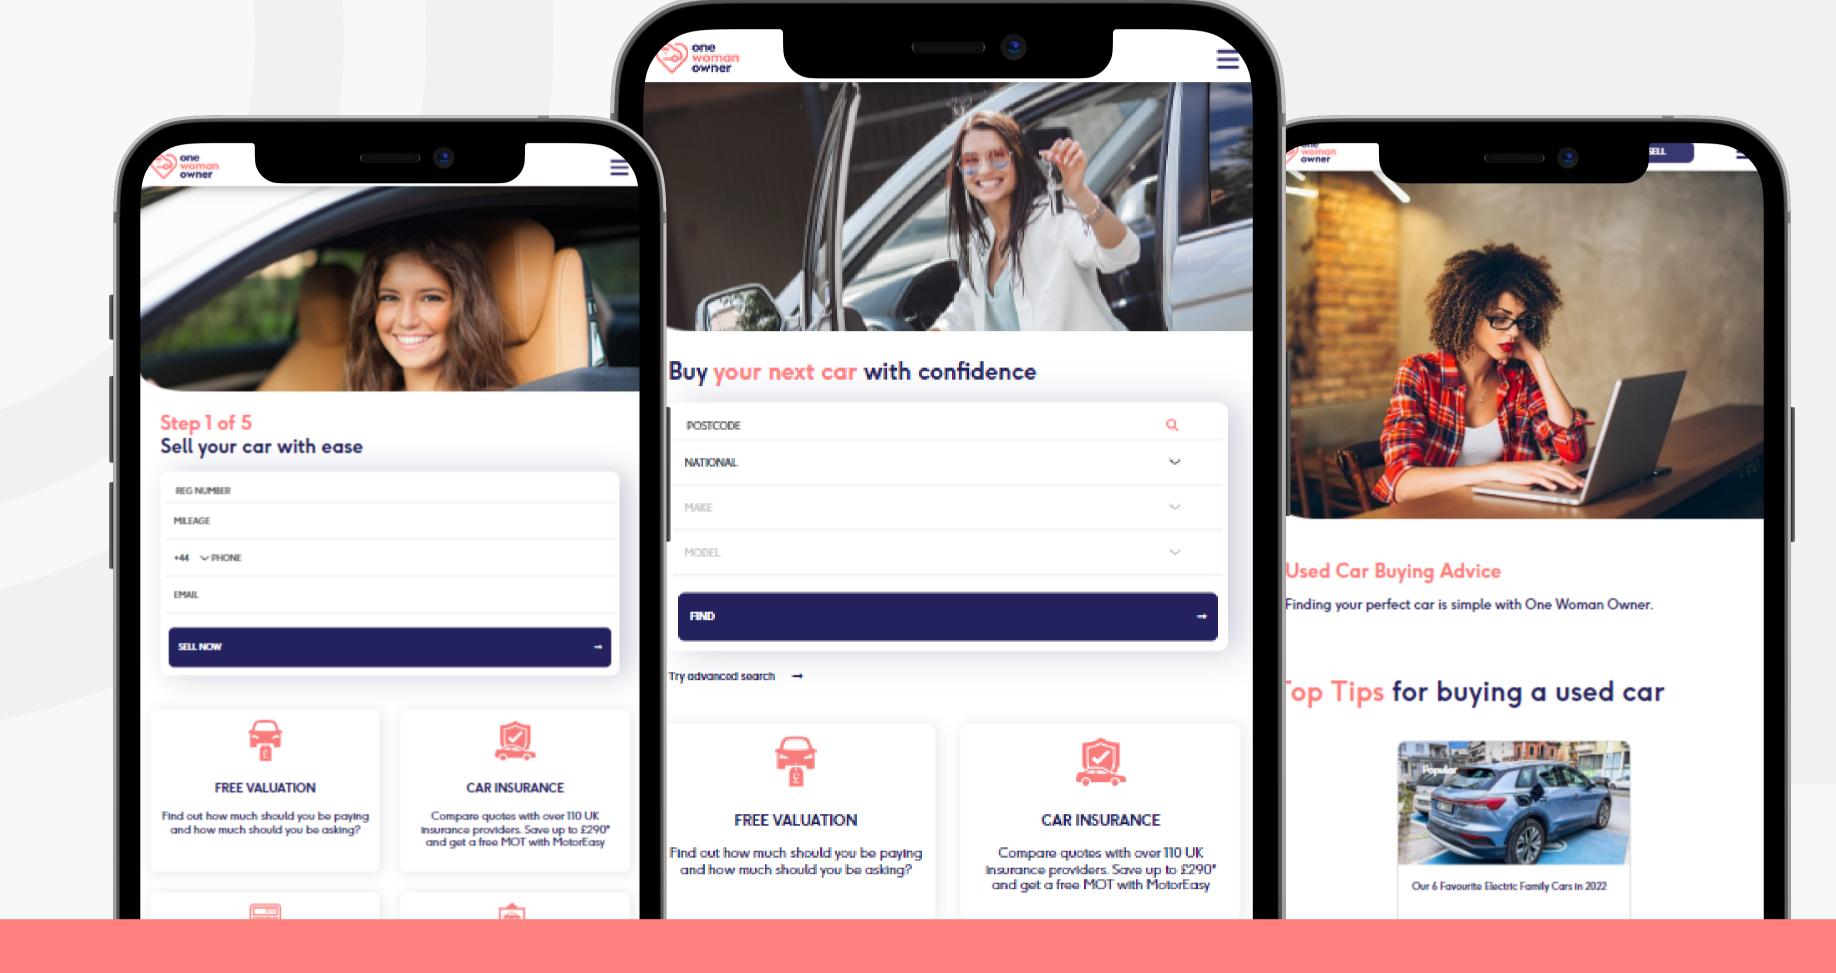

The Problem

One of the challenges we faced was designing a website that was both feminine and modern. We wanted the website to reflect the brand's values while also being visually appealing to our target audience. Additionally, we had to make sure the website was optimised for user experience and maximising advertising revenues.

The Goal

Our primary goal was to design a website that was approachable, intelligent, sociable, spontaneous, cheeky, witty, fun, exciting, and engaging to our target audience. We wanted the website to be a useful resource for potential buyers.

(6), Design Process

understanding their pain points. The team defined the goals and objectives of the website, followed by ideation and prototyping. Several design iterations were made, with user testing and feedback playing a crucial role in shaping the final product. The team constantly worked towards understanding and refining the user experience. The result was a modern, user-friendly website that reflected the brand's message and catered to the needs of its audience.

For One Woman Owner (OWO), the design process started with empathy towards the target audience and

The First Female Focused

Car Marketplace

Our design team worked closely with our client to develop a unique and engaging web design that accurately

reflected the brand's values. We incorporated bright and bold colours, modern typography, and high-quality imagery to create an exciting and engaging experience for the user. Our team also implemented features like free valuations, car insurance, car finance, and car history check, making it easy for buyers to access all the

and sales.

Conclussion

• The redesigned website has helped One Woman Owner establish itself as a unique, female-focused car marketplace.

• The improved user experience and integration of key features have contributed to increased engagement
